

Dear Dr. Becker,

11/22/99

I can't thank you enough for the wonderful job you did on my right breast reconstruction. I was extremely nervous about the surgery, but you and your office made me feel as comfortable as possible. Everything went so smoothly, and I finally feel like a woman again.

You are an inspiration for any woman going through breast cancer, and possibly facing a mastectomy. With you around, woman should know that the mastectomy and cancer is not the end of the road, but just the beginning. I would recommend you to anyone facing this terrible tragedy, with 100% confidence.

It's hard to believe that it only took one visit after the hospital, to be fully expanded. The saline expander feels and looks just like my natural breast. I can finally throw out my mastectomy bras and pads, and buy normal bras. I am looking forward to visiting you in the future, and once again, a great big thank you to you and your staff.

Enjoy the holidays coming up!
I know I will!

Sincerely, your patient,

Cindy Messing
