

October 16, 1997

Dear Dr. Becker:

This is just a note to thank you and your staff for the special care you all gave me. I know a few other women who had breast implants who were only seen by their doctors a few times post-surgically. I must have been to your office 15 times following my surgery. This gave me a feeling of great trust and confidence with the outcome of my procedures.

I'm glad I was awake during surgery and I would recommend it to anyone. I was able to communicate with you, Dina and Shelly, as well as laugh a little which made me feel very comfortable and in good hands.

I called you a couple of times on Saturdays with some concerns and you not only responded immediately, but you gave me a follow-up call on Sunday to see how I was doing. You're the greatest and I love my perfect new breasts. They look so natural and I feel like they're really mine (well, I guess they really are mine)!

I felt a little bad at my last appointment that I wouldn't be back for three months. I've grown accustomed to seeing you and Dina, especially. You feel kind of close to people when every time you see them, you show them your boobs! Dina, don't forget to put my phone number under my pictures (I am kidding of course).

Thank you again and I will try to bring in a Greek dish one day when I'm off from work so I can bring it in warm.

Sincerely,

A handwritten signature in cursive script that reads "Dina".

Dina
