Dear Dr. Becker and Dina:

I would like to inform you both of my innermost feelings and thank you both for my successful plastic surgery on my face. To me you are the original "dream team" furnishing your patients with "compassion," "competency" and "clairvoyance" in every procedure. If in the future you have any patients who are undecided to take the plunge to have the facial surgery, please have them call me for my opinion on this matter.

Thanks again!

Respectfully submitted,

Barbara

P. S. Elaine is also great in every way.
