Dear Dr. Becker,

I know that you have received hundreds of letters over the years, so I'm struggling for a unique and special way to express my appreciation for your help, kindness, generosity, humor and immense talents. You have used your brilliant abilities to make a difference in the lives of so many breast cancer patients. Having you as my reconstructive surgeon, turned a terrifying diagnosis into a hopeful, positive and finally, wonderful result. During the challenging events of my past year, the visits to your office have been so uplifting and I have received so much more than basic healthcare. Lutchie and the office staff are so professional, yet warm and genuinely care about their patients. Dr. Becker, it must feel terrific to be able to give such a gift to those in need. I'm fortunate to have met you and to have been the recipient of such a gift. I thank you from the bottom of my heart. God bless you and with love,
