Introducing the Becker Sub-Sonic Cannula SystemTM

The Becker Sub-Sonic Cannula SystemTM uses a low speed reciprocating motion to allow the cannula to pass effortlessly through soft tissue. The use of low speed strokes dramatically reduces the risk of burns and over-treatment associated with internal ultrasonic devices.

The Becker Sub-Sonic SystemTM, utilizes a 3mm stroke and is adjustable up to 12,800 cpm.

The Becker Sub-Sonic Cannula is the perfect complement for E.U.A.TM

The Becker Sub-Sonic Cannula SystemTM includes:

- Autoclavable Motor and Handpiece
- One Control Box
- 3 Cannulas**
- Operators' Manual

** includes one Becker Greatest GraterTM round cannula for high speed debulking.

Compare the Becker Sub-Sonic SystemTM to other technologies.

Internal Ultrasound	\$35,000.00-\$43,000.00
Other Reciprocating Cannula	\$7,900.00-\$9,900.00
Disposable Reciprocating Cannula	\$ 160.00 per procedure <i>plus</i> \$4,500.00 for new aspirator

Purchase the Becker Sub-SonicTM System for only \$3,995.00
(Ask about special pricing) with 3 cannulas included.
