

# Adjustability and Versatility. .

## **Becker Expander/Mammary Prosthesis**

Now, outstanding results are achievable with a *unique* product from a new generation of tissue expanders. . . The Mentor Becker Expander/Mammary Prosthesis.

## **Breast Reconstruction**

A proven generation in tissue expansion – one stage procedure – offer both surgeon and patient *options* in breast reconstruction.

The Becker Expander/Mammary often eliminates the need for a second stage replacement surgery required with temporary tissue expanders. We combined the expansion features of our Radovan™ tissue expansion technology with our Low Bleed Gel-Filled breast implant into one

device. The tissue expander converts to a breast implant by removing the injection dome and fill tube in a simple office procedure with a local anesthetic. The patient benefits from reducing the trauma and cost associated with second stage surgical procedures. The surgeon benefits from better
