Now Available! Smooth Becker Expander/Implants

mentor's timely response to industry trends continues with the release of the new Smooth Becker 25 and Smooth Becker 50. As the only manufacturer of implants for single-stage breast reconstruction, Mentor is pleased to meet the market demand for a smooth product. For surgeons, this means having the option of either a Siltex -textured or a smooth surface Becker 25 and Becker 50 implant. For patients, it means having an implant with the feel of gel and a mature shape that maintains itself whether they're standing up or lying down.

While both the Becker 25 and Becker 50 are ideal as both a tissue expander and a long-term breast implant in single-stage breast reconstruction, they are also suitable options for the second stage of a two-stage procedure. Both implants have an outer lumen that is prefilled with silicone gel and an inner lumen that can be filled with saline postoperatively for up to six months.

Where two surgeries were once the only option, Becker implants are reshaping the way the entire industry looks at breast reconstruction surgery. To receive our free surgical technique video using Becker 25 and Becker 50 breast implants, call your local Mentor sales representative today.

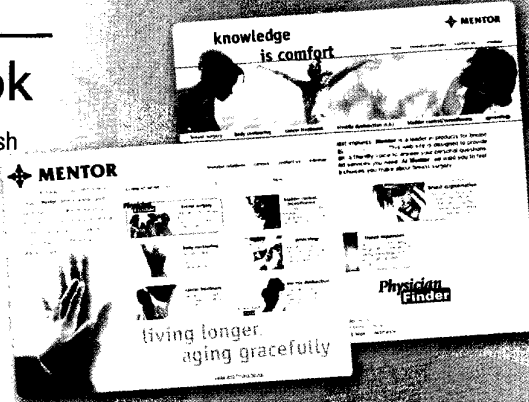

CAUTION: Investigational device. Limited by federal (United States) law to investigational use. This product is to be used only by a physician participating in a reconstruction core/adjunct or other approved products-use protocol sponsored by MENTOR, or a physician recognized as a clinical investigator identified in an approved Investigational Device Exemption.

www.mentorcorp.com — A Brand New Look

Mentor invites you to check out the fresh new look of our web site! In addition to a more sophisticated and cleaner style, the overall site navigation has been greatly improved and simplified. The mentorcorp.com homepage now includes a **breast surgery** link

that directs your patients to valuable information on reconstruction or augmentation. And the new **body contouring** link provides patients with a resource for exploring the options in liposuction. Our **physician finder** tool is also much more visible, appearing on each page of the site and increasing the chances that prospective patients will find your practice. So, stop by and visit us on the web today. We think you'll like what you see.
