

Immediate Breast Reconstruction After Mastectomy Using a Permanent Tissue Expander

HILTON BECKER, MD, FRCS, and FRANCIS MARAIST, MD, West Palm Beach, Fla

ABSTRACT: We describe a new breast implant that greatly facilitates immediate breast reconstruction after mastectomy. Through a detachable filling reservoir, the implant can be filled with saline by percutaneous injection; this allows the empty implant to be placed in position and filled only after viability of the flaps is assured. Because filling can be
